level of environmental protection in the absence of Union standards Scheme (The Scheme).

3. National legal basis

- Parliamentary Decision of 5 April 2001¹ on the basis of a proposition by the Ministry of Petroleum and Energy of 21 December 2000² The Parliamentary Decision amends the Energy Act of 29 June 1990 No 50 (Energiloven)
- Agreement (Avtalen) between Enova and the Ministry of Oil and Energy, on the management of the funds derived from the Energy Fund, during the period between January the 1st 2017 to December the 31st 2020³. On the 1st May 2018 the ownership of Enova (and the Agreement) was transferred from the Ministry of Oil and Energy to the Ministry of Climate and Environment⁴.

4. EEA legal basis

All aid⁵ provided under this Scheme will be within the limits set out in Article 36 of Commission Regulation (EU) No 651/2014 declaring certain categories of aid compatible with the internal market in application of Articles 107 and 108 of the Treaty (General Block Exemption Regulation).

A full version of the Regulation can be found at:

5. Definitions

For the purpose of the Scheme the definitions laid down in Chapter 1 Article 2 of the General Block Exemption Regulation (GBER) are applied by Enova.

6. Objective of the Scheme

The Scheme aims to achieve environmental protection by incentivizing investments in environmentally friendly activities resulting in or aimed at significantly improving environmental protection beyond the framework of Union standards or in the absence of Union standards.

To be eligible for aid under the Scheme the project shall fulfil one of the following conditions:

- The investment in the environmentally friendly activity shall enable the beneficiary to increase the level of environmental protection resulting from its activities by improving on the applicable Union standards, irrespective of the presence of mandatory national standards that are more stringent than the Union standards
- It shall enable the beneficiary to increase the level of environmental protection resulting from its activities in the absence of Union standards

Investments under the Scheme shall not be undertaken in order to ensure that undertakings comply with Union standards already adopted or not yet in force.

The Scheme is not sector specific and is technology neutral.

The following scheme provides the legal cover for award of support in line with the General Block Exemption Regulation. The scheme does not provide any additional funding or budget.

7. Eligible Costs

The costs of the project must be transparent and directly and exclusively related to the project. The eligible costs must be specified at the time of application.

The eligible costs shall be the extra investment costs necessary to go beyond the applicable Union standards or to increase the level of environmental protection in the absence of Union standards. They shall be determined as follows:

- Where the costs of investing in environmental protection can be identified in the total investment cost as a separate investment, this environmental protection-related cost shall constitute the eligible costs
- In all other cases, the costs of investing in environmental protection are identified by reference to a similar, less environmentally friendly investment that would have been credibly carried out without the aid. The difference between the costs of both investments identifies the environmental protection-related cost and constitute the eligible costs

The costs not directly linked to the achievement of a higher level of environmental protection shall not be eligible.

8. Aid Intensities

Aid intensity	
Small enterprises	60 %
Medium-sized enterprises	50 %
Large enterprises	40 %

The following scheme provides the legal cover for award of support in line with the General Block Exemption Regulation. The scheme does not provide any additional funding or budget.

--	--

9. Notification Threshold

Aid awarded under this scheme will be granted up to EUR 15 million per undertaking per investment project.

10. Body authorized to implement the Scheme

Enova SF⁶ is the authorized body to implement the Scheme.

11. Scope of the Scheme

The scheme will be open to undertakings that are registered in Norway and supports projects that are located in Norway or in the Norwegian economic zone.

Aid will not be granted to undertakings that are:

- Subjects to a pending recovery order; or
- In financial difficulties

12. Duration of the Scheme

The scheme will run from 1st January 2021 until 31st December 2024.

13. Budget for Aid under the Scheme

The estimated annual budget for the Scheme will be maximum 1.2 billion NOK.

Should the budget for this scheme increase, Enova will inform the EFTA Surveillance Authority.

⁶ <https://www.enova.no/about-enova/about-enova/259/0/>

The following scheme provides the legal cover for award of support in line with the General Block Exemption Regulation. The scheme does not provide any additional funding or budget.

14. Form of aid

All aid awarded under the Scheme will be transparent and in line with criteria set out in Article 5 of the GBER. Aid may be awarded by way of grants.

15. Eligible activities to be supported under the Scheme

The Scheme supports the following activities:

- Investments that aim to reduce GHG emissions within the fields of industry, transport and stand-alone facilities
- Investments in innovative technological solutions that promote energy and climate efficiency in buildings
- Investments to acquire new transport vehicles for road, inland waterway and maritime transport complying with adopted Union standards, provided that the acquisition occurs before those standards enter into force and that, once mandatory, they do not apply to vehicles already purchased before that date
- Investments to retrofit existing transport vehicles for road, inland waterway and maritime transport, provided that the Union standards were not yet in force at the date of entry into operation of those vehicles and that, once mandatory, they do not apply retroactively to those vehicles

There is no automatic entitlement to support from the Scheme. All support is subject to rigorous due diligence appraisal and internal approval by Enova and all projects shall be assessed against the conditions of the scheme and the criteria set out by Enova in the relevant programme.

16. Transparency

Only aid for which it is possible to calculate the precise amount of the aid at the point at which it is awarded will be provided under the Scheme (art 5 (1) GBER).

17. Incentive effect

Aid recipients must demonstrate that the aid is required for projects to proceed by submitting a written application before work on the project or activity has started. The application will as a minimum contain the following information (Art 6 GBER):

- (a) Name and size of the undertaking receiving the aid;
- (b) Description of the project, including its start and end dates;
- (c) Location of the project;
- (d) List of project costs;
- (e) Form of aid and amount of public funding needed for the project.

18. Cumulation

In determining whether the notification thresholds and the maximum aid intensities are respected, the total amount of State aid for the activity or project shall be taken into account (Art 8 GBER). The total amount of State aid may be comprised of local, regional, national or other funds managed and controlled by Norway as a contracting party to the EEA Agreement⁷.

EU funding that is understood as centrally managed and outside the direct and indirect control of Norway will not be

⁷ Ref. Structural Funds which qualify as State aid

The following scheme provides the legal cover for award of support in line with the General Block Exemption Regulation. The scheme does not provide any additional funding or budget.

taken into account for the calculation of the notification thresholds and aid intensities.

The total amount of public funding, which includes State aid and EU funding together and is granted in relation to the same eligible costs should not exceed the most favourable funding rate⁸ laid down in the applicable rules of EU/EEA Law.

Aid provided under this Scheme will not be cumulated with any de minimis aid in respect of the same eligible costs, if such cumulation would breach the applicable aid intensities.

19. Publication, Reporting and Monitoring requirements

Enova will ensure the publication on Norway's national State aid register (art 9 GBER) of:

- The summary information about each aid measure exempted under GBER in the standardised format laid down in Annex II of the GBER (ref. GBER information sheet), or a link providing access to it
- The full text of each aid measure, including its amendments (ref. the Scheme), or a link providing access to it
- The information referred to in Annex III of the GBER on each individual aid award exceeding EUR 500 000

In particular, the information on each individual aid award shall be organised and accessible in a standardised

⁸ The term "funding rate" is broader than "aid intensity". It refers to the ratio of the total amount of public funding (State aid and EU funding together) to the eligible costs for a specific project

The following scheme provides the legal cover for award of support in line with the General Block Exemption Regulation. The scheme does not provide any additional funding or budget.

manner, as described Annex III, and shall allow for effective search and download functions.

All the above information shall be published within 6 months from the date the aid was granted and shall be available for at least 10 years from the date on which the aid was granted.

Enova will follow the requirements on reporting and monitoring as they are described in articles 11 and 12 of the GBER.

Detailed records with the necessary information and supporting documentation will be maintained for 10 years from the date of the last award of aid under the Scheme.

Enova will provide the EFTA Surveillance Authority with all the information and documentation it considers necessary to monitor the application of the GBER within 20 days of such request from the Authority.
